

CleanWaterCleanAir™

Drink Clean – Breathe Clean – Sleep Well

KEY PRODUCTS

Industrial/Municipal treatment skid Pre-engineered for large systems at 250 gallons per minute
600 gallons per minute
Includes Rebel-EZ for large systems
Scalable and modular custom systems.

UltraSafe whole house treatment system
The most complete treatment system available.

UltraSafe under sink system
Removes PFAS, micro plastics, lead, bacteria, virus, cysts spores.

Travel Canteen
Large fill opening for quick fills'
Removes PFAS, micro plastics, lead bacteria, virus, cysts and spores.
Drink from any non silt source

Emergency/Survivor kit
Includes 2 water bottles
Includes under sink

Ultra Water Bottle
Drink Water from any tap in the world
Drink from rainwater or non-silt streams

Product Details - The CleanWater UltraSafe SS System filters use a proprietary patented electro-positive filter media that rapidly adsorbs particles, as small as a few nanometers.

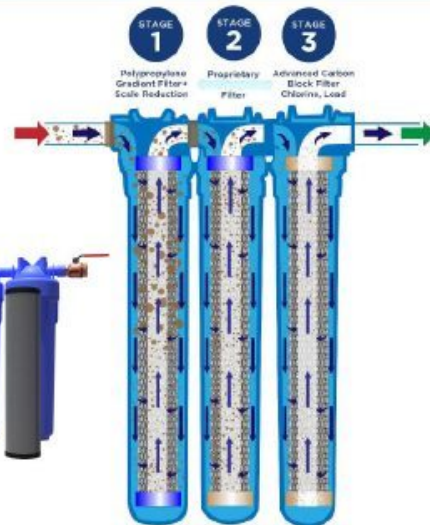

- Advanced Ultra Filtration
- Great tasting water
- Third-party tested and compliant with NSF 42, 53, 61, 372
- No Chemicals
- Large capacity filters
- Annual change out in most applications
- Water softening (Optional on request)
- Low cost to maintain
- Easy to maintain
- Saving the planet, replacing bottled water with CleanWater Filtration Systems.
- No Chemicals.
- 99.999999% Removal of Bacteria
- >99.99% Removal of Spores, Bacteria, Cysts
- PFAS / PFOS / PFOA – Forever Chemicals
- Viruses, pathogens, mold, fungus
- 'Allowable Toxins' – chlorine
- Heavy Metals, Lead, Micro-Plastics
- Pesticides, Pharmaceuticals
- Adding Micro-Nutrients & Minerals for Optimum Health benefits
- Eco-Friendly
- Eliminates the use for plastic water bottles
- Treat and ELIMINATE wastewater streams

Never question what's in your water again.

Whole House Ultrafiltration For Municipal Water Systems

UltraSafe Trio[™] MUNICIPAL WATER

Stage 1

Stage 1 uses a multi faceted filter to filter out large particles greater than 5 micron and to condition the incoming water so it can no longer form calcium carbonate. This filtration process extends the life and reduces maintenance of the proprietary element in the next stage.

- Filters out sediment
- Conditions water so glasses and faucets remain spotless

Stage 2

Stage 2 uses our proprietary filter to filter out bacteria, viruses, cysts, spores, and other pathogens. It is engineered with an activated carbon high surface area paper to reduce pathogens, pesticides, pharmaceuticals, forever chemicals (PFOA/PFOS), and heavy metals (including lead). Incorporates Agion silver particles to keep filter from biofouling.

Stage 3

Stage 3 Final polishing of PFOA/PFOS, lead, chlorine, pesticides, and other contaminants with a high-capacity carbon filter. Improves taste and smell of water. This carbon will outperform similar carbons due to the purity of water at this step of the process.

Drink Clean – Breathe Clean – Sleep Well

Whole House Ultrafiltration For Well Water Systems

UltraSafe Trio[™] WELL WATER

Stage 1

Stage 1 uses a multi faceted filter to filter out large particles greater than 5 micron and to condition the incoming water so it can no longer form calcium carbonate. This filtration process extends the life and reduces maintenance of the proprietary element in the next stage.

- Filters out sediment
- Conditions water so glasses and faucets remain spotless

Stage 2

Stage 2 uses our proprietary Hi Flow/Hi Capacity mechanical filters to remove some bacteria/viruses as well as further removing particulate to enhance Stage 3 filtration performance.

Stage 3

Stage 3 uses our proprietary proprietary filter to filter out bacteria, viruses, cysts, spores, and other pathogens. It is engineered with an activated carbon high surface area paper to reduce pathogens, pesticides, pharmaceuticals, forever chemicals (PFOA/PFOS), and heavy metals (including lead). Incorporates Agion silver particles to keep filter from biofouling.
