

# CleanWaterCleanAir™

Drink Clean – Breathe Clean – Sleep Well

## Whole Home Filtration Package For Municipal Systems

Includes One Whole Home Unit  
and Two UnderSink Units

UnderSink Unit

**Select** Whole Home Package 5 – 10 GPM  
Whole Home Package 10 – 20 GPM  
Whole Home Package 20 – 40 GPM

### Stage 1

**Stage 1** uses a multi faceted filter to filter out large particles greater than 5 micron and to condition the incoming water so it can no longer form calcium carbonate. This filtration process extends the life and reduces maintenance of the proprietary element in the next stage.

- Filters out sediment
- Conditions water so glasses and faucets remain spotless

### Stage 2

**Stage 2** uses our proprietary filter to filter out bacteria, viruses, cysts, spores, and other pathogens. It is engineered with an activated carbon high surface area paper to reduce pathogens, pesticides, pharmaceuticals, forever chemicals (PFOA/PFOS), and heavy metals (including lead). Incorporates Agion silver particles to keep filter from biofouling.

### Stage 3

**Stage 3** Final polishing of PFOA/PFOS, lead, chlorine, pesticides, and other contaminants with a high-capacity carbon filter. Improves taste and smell of water. This carbon will outperform similar carbons due to the purity of water at this step of the process.

Filter should be replaced annually for all units.  
Our Whole Home Systems ensure your cleanest water possible. Bringing water back to life.

Compliant  
NSF Standard 42  
Class I Particulates  
Cysts, Extraction

Compliant  
NSF Standard 53  
(PFOA/PFOS) less than 20 Parts Per  
Trillion  
(100PT PFOA/100PT PFOS) Chlorine  
Reduction, Extractions

Compliant  
NSF Standard 61  
Extraction and Pressure

Compliant  
NSF Standard 372  
NSF Lead-Free
